

# U.S. Silently Tortures Americans with Cell Tower Microwaves | NowPublic News Coverage

- *Regional Homeland Security- administered fusion centers use a nationwide microwave/laser electromagnetic radiation "directed energy" weapon system to silently torture, impair, subjugate unconstitutionally "targeted" Americans and their families -- an American genocide hiding in plain sight.*
- *Victims' own cell phones may be used to target them.*
- *How a young FBI agent's 'I believe you' gave victim the faith to go public.*

## GET POLITICAL w/ VIC LIVINGSTON

President Obama has told the nation and the world that America does not torture.

**President Obama is wrong -- and security/military/intel officials in his administration know it.**

America tortures. Not just Gitmo and Bagram "war on terror" detainees, but its own citizens.

Each day, a nationwide microwave/laser electromagnetic radiation directed energy weapon attack system employing "phased array" cell tower antenna transmitter/receivers and GPS satellites -- under the apparent command of dozens of U.S. Department of Homeland Security- administered "fusion centers" -- is used to silently and invisibly torture, impair, subjugate, and degrade the physical and neurological health of thousands of unjustly, unconstitutionally "targeted" American citizens...

...and most of the victims have no idea what is making them sick, tired, exhausted, irritable, confused, lethargic; plagued with painful, debilitating head and body aches, sharp, piercing, painful ringing tones audible only to the target, temporary or permanent cognitive impairment...

...leaving them unable to function normally and lead a happy, healthy life.

Victims of this government-engineered, stealth genocide are robbed of the most basic of human rights -- free will, freedom from external manipulation of their physiological and mental functions.

Medical experts have confirmed that irradiation with microwaves and other radio frequencies can induce injury, illness and disease, from strokes and aneurysms to cataracts and cancer -- and death.

The military aptly applies the descriptor "slow kill" to these weapons systems, capable of targeting and delivering a wide array of electromagnetic microwave and other radio frequencies with extreme precision -- not "faster than a speeding bullet," in the parlance of "Superman," but at the speed of LIGHT.

According to publicly available patents upon which the system is based...

<http://freepatentsonline.com/7629918.html>

<http://freepatentsonline.com/4456912.html>

... this "multi-functional radio frequency directed energy weapon system" can generate precision "directed" bursts of pulsed microwave energy, or other radio frequencies that effect human physiology, at variable power levels (or "amplitude"), using the combined power of multiplexed antenna installations -- hence the term, "phased array."

That fact likely explains why so many cell towers are popping up all over America, from urban neighborhoods to expansive rural plains and farmlands.

The cover story -- that these are just cell phone towers -- amounts to nothing less than a big government lie.

Yet the system is inextricably and ominously linked to consumer cellular communications.

**It appears that a human target's own cell phone may serve as a covert targeting device for this attack system. Those who are marked for electromagnetic attack could be paying for a telecommunications service that enables their silent torture, impairment and potential injury.**

*(For more on targeting technologies, see the footnote at the bottom of this article.)*

This cell tower attack network has been deployed under the cover of "national security," apparently as a means to instantly and covertly disable electronic devices that could be used as weapons by terrorists or hostile forces. The technology requires a continuous stream of microwave and laser radiation -- meaning that the entire population of the United States, as well as other nations, is now being bathed in microwave emissions every minute of every hour of every day.

Because the system has been built out only in recent years, no entity has studied the long-term health effects of having a stealth cell tower weapon system clustered in populated areas.

Victims of this attack system maintain that silent assaults directed at a targeted individual can cause "induced dementia" -- symptoms that mimic Alzheimer's disease and other cognitive dysfunction, but which can dissipate when and if the attacks cease -- or if the "amplitude" of the microwave frequency is turned down by its clandestine government operatives.

"The idea is to make the 'target' look mentally ill or emotionally unstable, so that the person can be shunted into a mental hospital or otherwise marginalized and removed from society," says one alleged victim, who says that the silent attacks rendered him so weak, disoriented and fatigued that he was unable to work for a period of four years.

This victim says he slowly regained his full cognitive abilities only after repeated visits to a local FBI office, where he pleaded with agents to intervene on his behalf. But he reports that the attacks have continued, causing both fatigue and sharp momentary pain that he says amounts to torture.

He also maintains that his local police chief is aware of the covert attack system, but appears to be powerless to stop the attacks.

"What kept me going when the attacks were most severe, from the summer of 2004 and into 2008, was when I went down to the FBI and literally begged a young FBI agent to help me, and she looked me directly in the eye and said, 'I believe you.'

"When she said that, it gave me the confidence to go public despite my fears that I'd be treated like some kind of a nut case. Now that the truth is getting out, I'm grateful to that young agent for giving me the faith to fight this."

**By the pervasive deployment of these weapons systems as a tool of torture and enslavement, the U.S. government is denying thousands of its citizens the inalienable right to life, liberty and the pursuit of happiness.**

**The U.S. government has enabled the "slow kill," torture, or impairment of thousands of its own people while cruelly stripping them of free will -- the very essence of what it is to be human.**

This classified weapons system functions in every community in America. Some local police officials know about it. Apparently, they have been sworn to secrecy on "national security" grounds. The mainstream media has its collective head in the sand, buying the government propaganda that a new generation of directed energy weapons is "less lethal" and thus "saves lives."

That is another big lie.

This covert torture matrix is every bit as heinous as the death machine of Nazi Germany -- perhaps even more so, because it is silent and invisible.

Victims of these silent assaults also are subject to relentless "community stalking" harassment, vandalism and terroristic acts performed by government-enabled "community watch" and policing organizations that have been transmogrified by a secret multi-agency federal program into a vigilante American Gestapo.

Victims also say they are subject to financial and career sabotage enabled by government agencies that have deemed them to be "dissidents" or undesirables -- or have slandered them as suspected criminals or "enemies of the state."

President Obama: Wake up. You and other top officials also may be in the cross-hairs -- and this stealth technology, when applied using Pavlovian methodology, can even be used to covertly influence behavior and decision-making -- maybe even your own.

*"These are crimes against humanity and the Constitution, being perpetrated under the cover of national security and 'safe streets' by multiple federal and local agencies and commands -- an American genocide hiding in plain sight, enabled by the naivete of those who think 'it can't happen here.'" -- Victor Livingston, former reporter for WTXF-TV Philadelphia, Phila. Bulletin, N.Y. Daily News, St. Petersburg Times; producer/host, MSG Network Sports Business Report; columnist, NowPublic.com/scrivener.*

#### **FOOTNOTE: TARGETING SYSTEMS**

*This cell tower- based microwave attack system apparently uses various advanced technologies to target human beings. According to information obtained from unclassified patents, defense industry trade journals, as well as an analysis of victim accounts, it appears that a three-dimensional, invisible infrared laser targeting sensor array secreted in or near the victim's home or place of business makes possible precision-placed electromagnetic frequency attacks, prolonged or sudden and momentary, to specific body parts -- internal or external.*

*The literature states that laser targeting systems can be trained on vehicles or moving targets, facilitating precision attacks even if the target is traveling at extremely high rates of speed.*

<http://www.defensereview.com/lucid-dimensions-spherical-detection-systems-sds-3d-passive-infrared-ir-spherical-sensor-array-detects-and-tracks-high-speed-ballistic-threats-aircraft-vehicles-you-name-it/>

*If such a sophisticated targeting device is not available, it appears the microwave attack system is capable of acquiring targeting coordinates from the intended victim's cell phone or GPS unit. In that case, the targeting is believed to be less precise, but still able to produce disorienting and painful attacks, such as prolonged and unremitting headache and induced weakness and fatigue.*

*Some victims of this stealth technology now use their cell phones and GPS units only when absolutely necessary, and remove the cell phone's battery to prevent the broadcast of their location coordinates. (Just turning off the unit does not suffice, since a cell phone's power can be turned on by remote control.)*

*If neither a 3D infrared laser targeting device nor a "live" cell phone is available, the system still appears capable of delivering painful, disorienting or even disabling frequencies. It is believed that the government has equipped certain personnel -- either its own agents, or, some victims believe, local law enforcement or civilian vigilantes -- with portable laser-equipped devices that can "paint the target" from a distance. It is possible that some sworn officers may be under the impression that this technology is used merely for "through the wall surveillance," not to attack citizens they are sworn to protect.*

*The literature also indicates that the microwave weapon system can engage the target by way of tiny RFID tags covertly placed in or on the target's possessions or clothing. These film-thin RFID tags are ubiquitous in everyday commerce, used for inventory tracking of many consumer products. "GPS-linked" video surveillance systems, in public areas or inside commercial establishments, also could be used to transmit targeting coordinates to government command centers.*

*High-powered military satellites are believed to be capable of detecting ground-based tracking devices from low Earth orbit.*

*The article linked below, from the web site of the conservative Heritage Foundation, describes a directed energy weapon system that sounds much like the cell tower- based system described here. The article discusses a microwave/laser weapon system capable of both tracking and engaging a speeding target at the speed of light.*

<http://www.heritage.org/Research/BallisticMissileDefense/bg1783.cfm>

*The Heritage Foundation article describes directed energy weapon systems as "under development," despite the fact that the cell tower- based system is fully operational. Also, sentences referencing the effectiveness of directed energy systems against "human targets" such as "terrorists" apparently have been expunged in recent weeks -- after this author quoted the article in the "comments" section of this web site.*
